

Digital instant water dispenser

CJ-20L: 20L hot water only instant water dispenser.

Product characteristics:

- Super heating power: 2400W. Electric power is bigger than hot water flow. Hot water is offered continually (99°C~100°C).
- The heating system is controlled by full function digital controller.
- High brightness LED display can show hot water temperature
- When hot water temperature is down to 97°C, the system will heat the water back to 100°C automatically.
- Water level sensor inside. Automatically supplying water when water is used.
- All the structures are made by stainless steel, which are durable and never rusty.
- Cutting off the power supply automatically when water source is shortage.
- Cutting off the water source automatically when power is off. User won't drink any un-boiled water.
- The hot water faucet is with safety lever. It can avoid children scalded by hot water if children use the dispenser carelessly.
- The machines can be installed on the table top or be mounted on the wall
